ENGINE SPECIFICATIONS 23

The 2014 Quattroporte is the Maserati flagship and is the sixth generation of the original luxury sport sedan created in 1963. With the first Quattroporte, a racing engine was combined with a superb performance sedan to deliver world-class performance. The new Quattroporte remains faithful to this tradition by combining superior style, space, comfort and speed.

The new Quattroporte is larger, lighter, more luxurious and practical than the acclaimed car it replaces. With a 191 mph (307 km/h) top speed, it is the fastest and most powerful four-door Maserati ever built. Its 523 HP V-8 engine and the large cabin are central to the Quattroporte's design, dominated by a long, powerful hood with flowing lines and concave Trident grill which provide a clear link to Maserati's purely Italian tradition of GranTurismo.

Maserati Quattroporte boasts new-technology intercooled and direct-injected twin turbo engines. A 3.8-Liter V8 and a 3.0-Liter V6 were each designed by Maserati and are hand-assembled by Ferrari in Maranello, Italy. Engineered at the highest development level, the new turbocharged powerplants set benchmarks for Maserati horsepower and efficiency while producing the unique Maserati sound.

The spacious interior is an environment of exquisite simplicity where driving and design are in harmony and technology is readily at hand and easily used. The quality and selection of fine materials and colors creates a design that stimulates feelings of happiness. For the first time in the new Quattroporte, the security of standard All-Wheel Drive is available on the turbo V-6 variant, providing improved traction under a variety of road conditions and impressive acceleration.

The new Quattroporte is the Italian vision of how perfectly beautiful a luxury sport sedan can be while setting the tone for Maserati's future and remaining faithful to the history of Maserati.

PERFORMANCE – 523 HP V-8 with 0-60 mph in 4.6 seconds and a 191 mph top speed

DESIGN – The classic Maserati style from the flowing vehicle lines to the concave grill with Trident

SPACE – The longest and most spacious Maserati ever offered with true comfort for five

EFFICIENCY – Twin-turbo engines, 220 lb lighter weight and 20% improved economy and emissions

TWIN-TURBO V-6 WITH AWD – The most secure all-weather performance car in Maserati history

MASERATI HERITAGE

In 1963 Maserati originated the concept of a sports sedan with the launch of Quattroporte. Since that time, the Quattroporte has been admired for its balance of style, luxury and high performance.

2014 QUATTROPORTE INTERIOR HIGHLIGHTS

MASERATI

2014 QUATTROPORTE ALL WHEEL DRIVE

ALL-WHEEL DRIVE SECURITY

A completely new Maserati AWD system has been engineered for handling, efficiency and light weight. The all-wheel drive system is capable of distributing torque from rear to front and rear within 150 milliseconds, helping maximize traction and surefootedness in all weather conditions.

All-Wheel Drive Available
on Quattroporte V6 Only

INTELLIGENT Q4 AWD SYSTEM

The intelligent Q4 AWD system provides a performance-optimized torque split from 100% at the rear for high-speed, to a 50% split to the front axle for traction. Quattroporte AWD maximizes traction safety and works with the Maserati Stability Program to provide grip on the most slippery surfaces.

MASERATI TWIN-TURBO V6 ENGINE

The new Maserati V-6 twin-turbo engine powering the AWD system delivers 406 ft-lb of torque at only 1,750 rpm exceeding the last generation top version Quattroporte Sport GT S V-8 in a car weighing 200 lbs less with 60 mph reached in only 4.8 sec.

2014 QUATTROPORTE ENGINE SPECIFICATIONS

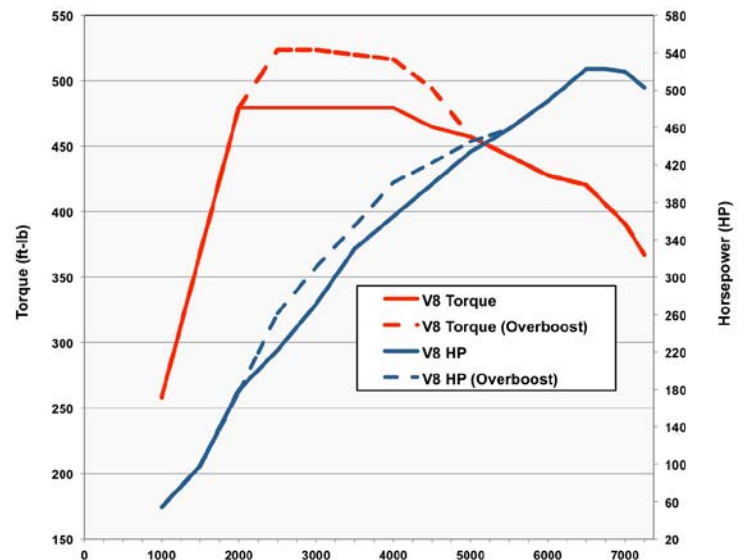

NEW MASERATI ENGINE

Developed by Maserati and produced by Ferrari in Maranello, the new 3.8 liter twin-turbo V-8 is the perfect expression of Maserati performance. The new V-8 provides high performance with 523 maximum horsepower and 524 ft-lbs of torque via gasoline direct injection and turbo overboost function. The engine delivers outstanding efficiency and vehicle range improved by +20% with a 0-60 mph time of under 4.7 seconds and a 190 mph top speed.

HIGHLIGHTS

- 3,798 cc V-8
- 523 HP / 524 ft-lb Torque (Overboost)
- Twin-turbos with intercooling
- Gasoline Direct Injection (GDI)
- Dual-Overhead Camshafts with 4 valves per cylinder
- Maximum torque available at 2,500 RPM
- 7,200 RPM Redline
