[SAVE & CONTINUE](#)

* Fields marked with an asterisk are required.

Under **'Select Program'**, the dealership you choose in Step 2 should appear and under **'Account Email Address'** your email address should appear. **Fill out the rest with your information.** If you have a **tracking number** use that for 'direct'.

5. The next steps are to download your signature into your outlook email. You can find the dynasend application either from within your Windows START menu or in your Windows System tray as follows:

Click the icon to open the app.

6. Click **"Download Your Signature Now"**

Note: If you use the online version of Outlook that is found in Office 365 then you need to click the check box next to "Sync my Signature with Office 365" and then enter your Office 365 password.

After 15 seconds or so you should see a message telling you that the download is complete. Click "OK".

Note: If your signature does not download successfully, verify that you have your email address entered correctly in the app - it must match the email address used when creating your signature via our online portal.

7. Close the app, and restart Outlook.

8. Click "New Message" and see if your signature (or updated signature) appears. **If it does, you're done.**

9. If you do not see the updated signature yet, follow these steps:

- from your inbox, click FILE in the upper left
- click "Options"
- click "Mail" in the left-hand column
- click the "Signatures" button (over to the right)
- set the default signature for new messages and for replies & forwards to "signature"
- click "OK" to close the dialog box

10. Return to your inbox and click "New Message" and you should now see your updated signature.

Note: Hyperlinks in email never work while you are composing or responding to a message. To test your links, compose a message to yourself, and try the links when you have received it and are reading it.
